

MARIA AMANDA DEVINA

(+62)82261550524 | ipebehmaria@apps.ipb.ac.id (university) | mariaamandaipb62@gmail.com (personal)
| <https://www.linkedin.com/in/maria-amanda-devina/> | <https://github.com/marimoria>

Bachelor of Computer Science at IPB University focusing on Machine Learning and Data Science. Passionate about using computational and statistical tools to solve complex challenges in public health, climate resilience, and social welfare to drive international change.

EDUCATION

Institut Pertanian Bogor - Bogor, Indonesia Mar 2025 - Mar 2029 (Expected)
Bachelor of Computer Science (3rd Semester)

- Consistent GPA of 4.0 across all subjects in the 1st and 2nd semester.
- Actively participated in multiple organizations and national essay or innovation competitions.
- Courses taken: Logical Mathematics, Computational Thinking, Statistics, Calculus, Algorithm & Programming.
- Educational focus: Machine Learning and Data Science.

SMA Marsudirini - Bekasi, Indonesia Jul 2022 - May 2025
High School Diploma

- Completed coursework in Advanced Mathematics, Physics, Informatics, and Advanced English.
- Conducted research and authored scientific papers on waste management and Arduino-based waste sorting systems.
- Awarded 2nd Place for Best Scientific Paper in Informatics on Arduino Trashbin.
- Ranked 5th in Final Assessment (avg. score: 89.05) and 6th among top graduates (avg. score: 89.46).

EXPERIENCE

Data Science Academy (DSA) Compfest Universitas Indonesia - Bogor, Indonesia Aug 2026 - Present

- Awarded 2nd place for Best Participant and Most Active Participant.
- Collaborated in a 1-month bootcamp with a cross-divisional team (PM, SE, DSA, UI/UX) to develop 2 prototypes: e-KYC & FireLine.
- Developed a full automated pipeline with quality triage to extract international cards information using paddleOCR, LightGBM.
- Built a flexible quality check triage in handling different format cards using OpenCV and RandomForest.
- Incorporated 3 national datasets of Kalimantan Forest Fires to create a dashboard for locals and volunteers with Streamlit.
- Engineered a priority scale based on FRP and school zone distance as well as citizen density of an area.

AKUCUCIIN Online Laundry Startup - Bogor, Indonesia Mar 2026 - Present
Data Analyst & Fullstack Software Engineer Intern

- Collaborating with 8 technology staff in building a 99,9% uptime online laundry platform.
- Analyzing real-time transaction data of 919 active users in MySQL and Python with Numpy and Pandas.
- Working together with 3 hotels building a B2B laundry platform using React and Next JS.
- Representing as Chief of Technology (CTO) at a national entrepreneurship competition P2MW.

Google Developer Group IPB University - Bogor, Indonesia Oct 2025 - July 2026
Artificial Intelligence Research & Development Staff

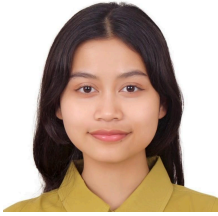

- Actively coordinating and participating in 3+ collaborative programs including with Kumparan AI and Skillio.
- Responsible for curating the learning roadmap and curriculum on Artificial Intelligence and Machine Learning for 275 members.
- Structurizing 1 tech bulletin per week on interdisciplinary AI/ML usage.

IPB OUTSCO (Outstanding Student College) - Bogor, Indonesia Oct 2025 - July 2026
Member of Batch 7

- Participated in 5+ scientific writing and essay mentoring sessions.
- Participated in 6+ mentoring sessions on problem solving, leadership, public speaking, and design thinking.
- Held a non-profit organization activity "SABUN" to teach local 40+ children about scabies prevention.
- Participated in 10 national competitions about science and data driven technological innovations.

Software Engineering Academy (SEA) Compfest Universitas Indonesia - Bogor, Indonesia Aug 2025 - Sep 2025

- Collaborated in a 1-month bootcamp with a cross-divisional team (PM, SE, DSA, UI/UX) to develop 2 prototypes: Allertify & LevelUp.
- Utilized Gemini API and latest software engineering convention to create allergy alert mobile application.
- Contributed to development while co-authoring technical documents and a PRD with 40+ functional requirements and 25+ user stories.

| <https://www.linkedin.com/in/maria-amanda-devina/> | <https://github.com/marimoria>

Bachelor of Computer Science at IPB University focusing on Machine Learning and Data Science. Passionate about using computational and statistical tools to solve complex challenges in public health, climate resilience, and social welfare to drive international change.

PROJECTS

Fireline: Kalimantan Integrated Wildfire Risk Intelligence & Response Dashboard Aug 2026 - Present

- Synthesized 57,785 satellite fire hotspots with population, school, and climate data to rank fire risk across regions.
- Engineered a 0-100 risk engine that identified 16,395 critical hotspots (28.4%) for prioritized response.
- Operationalized response routing for 2,890 extreme-FRP hotspots and flagged 11,294 critical hotspots within 3 km of schools.

E-KYC (Know Your Customer): Automated International Identity Verification & OCR Pipeline July 2026 - Aug 2026

- Designed an end-to-end OCR verification pipeline evaluated across 632 identity documents.
- Engineered 23 image + spatial/text features using Random Forest and LightGBM with 25 Optuna trials and 5-fold CV.
- Automated extraction across MyKad, MRZ, EU IDs, and ~170 countries with confidence-based approval and human-review routing.

Jaundara (Jaundice Detection): Analisis Seleksi Fitur Multi-Warna dengan SHAP sebagai Inovasi Estimasi Tingkat Bilirubin Neonatus pada Bayi Apr 2026 - July 2026

IPB Delegation for Satria Data 2026 & GammaFest Submission 2026

- Co-developed "Jaundara" in a 3-member team representing IPB in the Satria Data 2026 Statistics Essay Competition.
- Built a computer vision pipeline using HSV masking and luminance augmentation to preprocess 2,200+ clinical images.
- Extracted 60 features across 4 color spaces and applied SHAP (Shapley Additive Explanations) for optimal feature selection.
- Developed a LightGBM model achieving 93% classification accuracy and predicting continuous bilirubin levels with a 2.54 RMSE.
- Designed a mobile prototype and a deployment roadmap for Jaundara using Figma.

Pengaruh Curah Hujan terhadap Produktivitas Padi di Wilayah Jawa Timur pada Tahun 2024 Jan 2026 - June 2026

- Led a 10-member team to evaluate the impact of El Niño & La Niña on rice yields, analyzing 456 observations across 38 regencies.
- Conducted analysis using Spearman & segmenting at a 134 mm median threshold to uncover non-linear parabolic relationship.
- Formulated a climate resilience classification matrix leveraging Coefficient of Variation for stability and significance testing ($p < 0.05$).

SABUN: 2 Weeks Youth Scabies Prevention Education Program at "Perintis Muda" Foundation Jan 2026 - Feb 2026

- Coordinated a health program for 34 children across ages (5-17), integrating hygiene education and soap making workshops.
- Increased average hygiene knowledge scores from 86.6% to 94.0%, with 88% of participants achieving high-mastery results.
- Facilitated daily hygiene tracking for 2 weeks resulting in 20 children maintaining consistent and honest self-monitoring habits.

Pay It Forward: Education Volunteer on Youth Life Management Skills at "Bina Harapan" Orphanage

Lead of Education Division

- Co-led a 22-person staff to deliver interactive life management workshops for 31 kids across ages (4-17).
- Structured the core curriculum, focusing on essential leadership and self-management skills for 31 orphaned children.
- Ensured high-engagement mentorship and personalized educational impact through FGD session.

SKILLS & ACHIEVEMENTS

- **Hard Skills:** Figma, VS Code, GitHub, JavaScript, Python, Matplotlib, Pandas, NumPy, Streamlit, Tableau C++, React.js, Vue.js, Node.js, React Native, Tailwind, HTML/CSS, PostgreSQL, Supabase, Jupyter Notebook, Google Colab, Statistical Analysis, Machine Learning Algorithms.
- **Soft Skills:** Collaboration, Leadership, Adaptability, Problem-Solving, TIME Management, Detail Oriented, Efficiency.
- **Achievements:** 1st Place Most Active Participant in DSA Compfest UI (2026) 2nd Place Best Participant in DSA Compfest UI (2026), IPB National Delegation for Satria Data 2026, 3rd place Mathematics OSI Competition by HIMAFI UGM (2025) 2nd place National UI/UX Competition: Innovative Business BINUS University (2024), 3rd place English Olympiad National Science Student Olympiad (OSSN) (2024).
